

200220" 688/200T

- Coal baseline

Qcoal = 4 t/h - heat input 33 tMW

FIG. 1

200307 6387001

Coal + NFSF co-combustion tests

FIG. 2

200220" 683/200T

Coal + NFSF co-combustion tests

FIG. 3

Comparison of emissions from coal and coal + NFSF co-combustion for an equivalent heat input (33 tMW)

FIG. 4

200220-688/001

Comparison of SO₂ emissions from coal and coal + NFSF co-combustion for an equivalent heat input (33 tMW)

FIG. 5

200220" 688/200T

Comparison of fly ash concentrations from coal and coal + NFSF co-combustion
for an equivalent heat input (33 MW)

◆ Dust concentration, BL ◆ Dust concentration, 3.6 t/h + 543 kg/h NFSF

FIG. 6

FIG. 9
